

How to Link *The Truth About Boarding Schools* to School Sites

Many schools have maintained links to “The Truth” Flash file hosted on the TABS website. In our recent move to our new website, this link may have been broken. Please use the updated scripts below to reconnect to the file.

An updated Flash file is planned for 2010. Once it's complete, we will replace the existing file so as not to break the link to your site.

1. Graphic link hosted on TABS site:

Copy the script below, determine where you would like “The Truth” to appear on your web page, and paste it within the web page's body tags. Note that the script requires space for an image with a point size of 85H x 122W, therefore plan your layout accordingly.

```
<a href="http://boardingschools.com/media/6649/truth.swf" onClick="window.open('http://boardingschools.com/media/6649/truth.swf', 'volc', 'status,resizable,width=821,height=551,screenX=100,screenY=100,top=10,left=10'); return false"></a>
```

2. Non-graphic link that reads: *The Truth About Boarding School*

Copy the script below and paste it within the body tags of your web page.

```
<a href="http://boardingschools.com/media/6649/truth.swf" onClick="window.open('http://boardingschools.com/media/6649/truth.swf', 'volc', 'status,resizable,width=821,height=551,screenX=100,screenY=100,top=10,left=10'); return false">The Truth About Boarding School</a>
```

3. Graphic Link hosted on your site:

The small apple logo is available at: <http://boardingschools.com/media/7053/thetruth.jpg>

Click the link, right-click on the logo and download the image. Move it to the desired directory on your school's website. Copy the script below and paste it in the desired location within the body tags of your web page. Map the script (bolded section) to the image file, then resize the image to best fit your page layout.

```
<a href="http://boardingschools.com/media/6649/truth.swf" onClick="window.open('http://boardingschools.com/media/6649/truth.swf', 'volc', 'status,resizable,width=821,height=551,screenX=100,screenY=100,top=10,left=10'); return false"></a>
```
